

HIGHLIGHTS

FROM THE 2020 ANNUAL REPORT

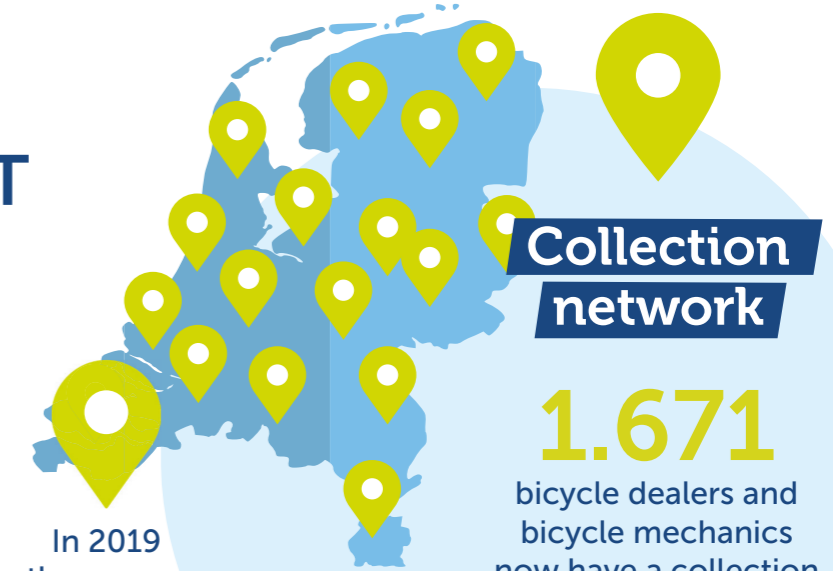

Recycling result

Stichting EPAC offers a collective solution for producers and importers of e-bikes when it comes to the collection and recycling of e-bike accumulators.

On behalf of Stichting EPAC, Stibat Services takes care of the fulfilment of the statutory manufacturer responsibility.

On 31 December 2020, **93 producers** of electrical bicycles were affiliated with Stichting EPAC.

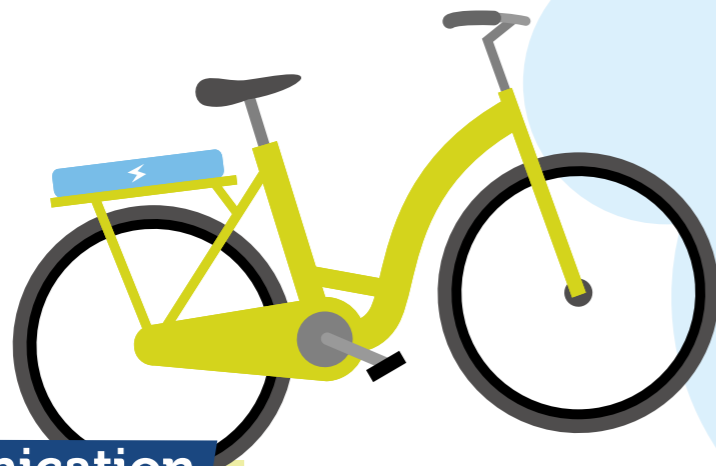

Collection network

1.671

bicycle dealers and bicycle mechanics now have a collection method for used e-bike accumulators

In 2019 there were **1.610**

Stibat Services not only ensures the optimum spread of collection methods, but we also provide clear, sustainable and recognisable barrels so bicycle mechanics and bicycle dealers can reliably and easily collect e-bike accumulators.

In 2020, a record number of more than **553 thousand new e-bike accumulators** was sold. An increase of **32%** compared to 2019.

Communication

While communication is not a legal requirement for the producers, Stichting EPAC believes it is important to encourage end users to separately hand in e-bike accumulators. In 2020, Stibat Services used the following to bring this about:

Websites

- www.stibat.nl (for clients and members of the collective)
- www.legebatterijen.nl (for consumers and primary schools)

Publications

- Via trade magazine De Tweewieler:
 - we reached **35 hundred** new bicycle dealers in 2020
 - we achieved a conversion rate of **52.2%**
 - we received **34 new** registrations

Ecotest

Avoided **2.4 million** kilograms of CO₂ emissions

Avoided **40 million** kilograms of hazardous emissions
