

HIGHLIGHTS

FROM THE 2020 ANNUAL REPORT

Recycling result

The realised recycling percentage of portable batteries (including slugs)

Stichting Batterijen offers a collective solution for producers and importers of portable and industrial batteries. On behalf of Stichting Batterijen, Stibat Services takes care of the fulfilment of the statutory manufacturer responsibility: the collection and recycling of portable batteries and accumulators.

On 31 December 2020, **1,168 producers of batteries and accumulators** were affiliated with Stichting Batterijen.

Stibat Services has at least one collection point per **2,000 inhabitants in each municipality**. An collection network with safe, sustainable and recognizable collection units.
